

STAGE PLAN AND TECHNICAL REQUIREMENTS

www.starlineband.sk

(illustrative band layout)

REQUIREMENTS

1. Electrical socket 1x 230V / 50Hz 16A.
2. Output from our „MASTER“, 1x stereo cable with L-R connectors JACK 6,3 mm.
3. Stage monitor for exclusive communication with the sound engineer.
4. Wireless microphone for exclusive communication with the sound engineer.

- a) We exclusively use our own stage monitor - from our „MASTER“.
- b) Illustration of the movement zone for the singer.

- The size of the stage at least 4x3 meters in a good technical condition with undamaged roofing.
- The concert equipment must be able to play in the frequency range of 35Hz to 18000Hz.
- The concert equipment must be able to create a sustainable sound level without a limit and distortion from 100 to 110dB.
- Provision of a parking space for a car with a trailer close to the podium, but not more than 20 meters away.

DESCRIPTION: We are a music band that adapts to the music genre and the character of the event, so our „PLAYLIST-REPERTOIRE“ is fully flexible.
We use sound processors, effects processor as well as a vocalizer and others, so we adjust the MASTER „on the go“ based on the need for the songs played.
